### My Future

This is a story about Laura becoming a teacher after college. The most important thing to her is education. She more than anything wants to see the kids at Terry High School learning, but can't right now because she is only in elementary school!

She will attend Terry High School and then go to UT in Texas so she won't be far away from home and family.

Mrs. Vasquez is one of the only reasons why she wants to become a teacher. She taught Laura how to add details to writing and made learning fun!

When she becomes a teacher she will teach reading, social studies, and science. When she teaches reading and social studies and science, they better know what fanboys are! Teaching grammar will be very important so you won't make fun of people.

Laura would to be a smart, positive, and kind young lady. Finally, when she becomes a teacher, she will be an awesome teacher.
