

# Zubons

By: Daniel S

Once upon a time there was a boy Named Daniel, he was a kind and funny person and always wanted to see Zubons, "AKA" unknown species. He really really wanted to find them. The one day he starts his preparing for his journey. Then after a while he realized that he had no transportation to get the Zubons because they're in space in planet Zubas. So he decides to build a rocket ship to go to outer space. After days and days he finally gets finished with his rocket. He puts all of his belongings in the rocket and flew straight to outer space.

Five hours later he finally finds Planet Zubas it was a big yellow and purple planet and it was miraculous. He landed on Zumbas got off the rocket and started looking around and he saw them the Zubans. They were magnificent. Then he felt like going home. He started walking to the rocket, but then once he got closer to it .... It explodes! The Daniel saw one of the Zubans pulled one of the wires to make it self destruct. Daniel was doomed, how was he going to get back home, he just wanted to see the Zubans one time to see if they were real. They were, so how is he going to tell everyone they're real. He wandered off to the Zubana Jungle the biggest Jungle on planet Zubas, because he thought He could build a new rocket to get home.

He started gathering wood and went to go find gas or fuel. So he went to the great Zuba falls and it was beautiful, he was going to use the waterfall because it has 50% gas in it and only Zibbish (Zuban Fish) can swim in it. A very interesting species of fish. So Daniel gathered all of his materials and took them to a place where it was open and good to work in. He got started the pieces of wood were heavy so it took him a while, then two hours later he finished so then he presses start and then it all collapses and broke. Daniel just sat down and just started crying thinking he will never go home. Then he heard something behind him and pretend to do a shadow clone... Juszu (animal powers) and saw that it was a herd of Zubans and they all had something that could help Daniel with his rocket. So they started to build his rocket. They used wood, water/fuel, and a hard material called Zumban metal that could keep the rocket together. One hour later, they finished the rocket he went in and pushed start....it started flying and Daniel was happy it worked and once he got to space he looks down and sees a Zuban hanging on the bottom of the rocket. He opened the door grabs him and they looked at each other and smiled. Daniel named the Zuban Marshall. Once they got home they went to his room and went to bed. And that is the story of how Daniel Serrano Acuna got upset with Zubans.
