

Soccer

By Jana H

My favorite sport is soccer. Soccer has been my favorite since I was small. I learnt to kick when I was six years old. Soccer is a popular sport. The history of soccer in the United States has numerous different roots. The modern-day game is often considered to have been brought to the United States through Ellis Island in the 1870's. However, recent research has shown that the modern game entered America in the 1850's through New Orleans when Scottish, Irish, German & Italian immigrants brought the game with them. It was in New Orleans that some of the first organized games that used modern English rules were held. Soccer is the power to exercise your legs and to run to get it to the goal. Soccer is fun to play with your friends on a team. Also, remember if you love soccer like me, then you will play and score for your team and win trophies. Best of all, the important thing for me when I play soccer is to have fun with your team. That's why soccer is my favorite sport.
