

# Triplets

By: Lili B

## Chapter 1

Have you ever heard of triplets ? If you have not I am going to tell you how my story all began. So here is my story .

On the day before the last day of school my parents were picking us up from kids klub and I was asking my mom a question about the epic vacation we were going to take that summer . I asked her the question and she said well about that we can not go on the vacation this year . Me and my brother were not very happy about that ! Then she and my dad were whispering for a few minutes about who should tell us and finally my mom said I will just tell them so that we stop arguing . She told us that she was pregnant with triplets ! Me and my brothers emotions changed completely!!!! From mad to very excited . My brother and I were super excited and immediately started asking a bunch of questions .Like are they all boys or girls ? Are they identical ? We asked a bunch of questions . Finally ,my mom was like hold on we just found out that I was pregnant with triplets today. We do not know anything yet and when we do you will be the first ones to know. Please do not tell anyone that I am pregnant with triplets yet ! Me and my brother said okay we won't .

## Chapter 2

Time passed and it was summer .We had a really difficult summer and it was harder to do things because mom was getting more pregnant by the minute . Finally the summer ended and it was time to go back to school . Eventually a few weeks into September my mom went to the doctor and they said that she was doing fine . ( Her due date was December 6th.) 2 days later a Friday my mom went to the doctor because she was not feeling very well at all . She went to the doctor and they said she was fine so she came home and she started feeling bad again . She went back and they said that she had a kidney infection . She stayed in the hospital for 2 days and she still was not getting better.The doctor did not feel very comfortable anymore because she was not getting better and he had been communicating with the Houston hospital. They decided that she would get airlifted to Houston in a helicopter.As soon as they figured out that she was getting airlifted to the hospital my dad had already went home to pack and be at the hospital before my mom got there ( my dad was at the hospital

with my mom.) As soon as they got there she still was sick with the infection but she felt fine .

### Chapter 3

Early the next morning like super early my mom had the triplets ! We figured out that they were all girls and their names were Elli ,Sylvi ,and Liza. They were born at around 4:30 in the morning.Once they were born they were the cutest babies in the world and as soon as we saw them we knew that our god had blessed us with the greatest gift of all sisters. As soon as they were born they had to get rushed to the NICU ( Neonatal Intensive Care Unit ) . Where they got breathing tubes ,feeding tubes,diapers , heart monitors , etc. When the triplets were born it was hard for our family because my mom had to live in Houston with complete strangers that were a friend of a friends parents that lived in houston . My mom stayed with them because otherwise she would be paying 50 dollars a night to stay in a hotel.

### Chapter 4

We ended up staying at the hospital a very long time . Sylvi stayed for 8 weeks and Elli and Liza stayed for 11 weeks . But the good thing about Elli and Liza coming home later was after sylvi got to come home since Elli and Liza were in the hospital they got to get transferred to the College station medical center . But while the triplets were all three still in the hospital my mom went everyday and my dad took a day off of work once a week and would come . He would bring me and my brother and we would spend the night at the house we were staying at with . When we were in Houston my parents would make sure to love on me and my brother as well as the triplets .

### Chapter 5

When the first triplet came home me and my brother were fighting on who got to change her diaper and who did not . Then when the other 2 triplets got out of the NICU me and my brother would complain and be like do we have to . But we still love our baby sisters very much and they are still growing strong and healthy . They are now a year old and very smart !
