

# The Possessed Boy

By: Ryleigh G.

## About The Kids

There are five kids in a group. Their names are Scott, Charlotte, Rachel, Madison, and Beau. They go to Converse Elementary. They are all in third grade.

Scott is the oldest in the group. He is the adventurous one in the group. He is also the most adventurous one in the third grade!! He is nice, helpful, and caring. He will never do anything wrong to anyone else.

Next is Charlotte who is about two months younger than Scott. She is the smart one in the group. She loves to read and do her work!! Like Scott Charlotte is nice, helpful, and caring.

Rachel is a different story. She is the trustful one in the group. She loves to do whatever she wants when she is told that she can. She does all her work, so that after she can do whatever!!

Madison is three months older than Beau. Madison is the writer. She does the whole project by herself!! She loves to help others!! Nobody loves school more than Madison.

Beau is the youngest in the group. Beau is the one that talks, and asks all the questions. He never stops talking during the assignment. Beau loves to work in groups because he likes working by himself.

It was a dark and stormy day. There was a group of kids that went to Converse Elementary. There were five kids in each group their names are Scott, Charlotte, Rachel, Madison, and Beau. They all go to the same science class, and they have a science project. Their science project is to do a report on the ancient times, so they went to a museum and it was closed.

After the first museum was closed they went to another one. They went to the next museum and it was haunted but the group did not know. There was nothing that showed that the museum was haunted so they went in and had a blast. They went to a room that had a glass box! In the glass box there was nothing. So Beau, the youngest, went into the box. Suddenly, he saw an old man in the shadows.

The old man was possessed, but again they didn't suspect that he was possessed. The old man's ghost passed Beau because he locked him in there. When Beau came out he was possessed so he went on and haunted every museum in the town.

All of a sudden Scott passed out. They called the ambulance. Beau haunted all the hospitals in the state. They had to go out of state and see what happened to Scott. Scott ended up being fine; it was just a little heart attack.

I figured out that Beau started acting very weird. "He is possessed because of when the old man had passed by him" said Charlotte. She was one of the oldest and Beau was the youngest.

Beau passed on the possessed ghost, so now the group he is in doesn't have the ghost. I can't believe that Kaylee is possessed; she is going to do very bad things. Kaylee is Madison's younger sister. She put down that she was 10 years old instead of 7 because she is so tall for her age. Madison never talks to her and they only time she talks to Kaylee is when something happens.

Kaylee killed a second grader named Jaden and there was blood all over the classroom. Everyone in Jaden's class quickly got upset and ran over to a different second grade classroom. This way, they didn't have to see all the blood that was in the room.

The teacher called the nurse to her room, but the nurse did not know what happened so they just called the hospital. While they were in there, they saw a lot of other kids in the hospital as well.

The doctor said "You see all the kids on this level? They all have the same problem as Jaden Lopez!" Nobody knows what is wrong or the cure to this disease. They aren't even sure if they know if it is a disease so they are still trying to figure it out.

Each scientist takes a sample of the kid's blood to test it. They try hard to figure out what this is and what is wrong with these kids. But still after 10 years nobody can figure out what is wrong with them. Soon after, they figure out that it was a tiny bug that crawls under your skin and bites you until you're possessed. No matter where the bug can get to, your hair or skin, it will possess you!

**The End**
