

Once, there was a nine-year-old girl named Jasmine who loved to act. Jasmine's parents did not want her acting. Jasmine's mom wanted her to be a cheerleader, and her dad preferred her to be in the math club.

One day, Jasmine decided that she wanted to do a play. After a lot of convincing, her parents finally let her do a show called "The Ugly Duckling". She went to practice and her director taught her all the audition material. The second day was the audition. Jasmine was so excited, she danced and sang her heart out, and she thought that she did a good job.

The next day, she went to practice and got her role, which was a backup dancer. She was so disappointed she told her director "I'm done I quit the play!" Jasmine ran home crying. Her parents told her "It's okay! You worked so hard, you will do great trust us." The following day, Jasmine went back to her director and said to her "I want to be back in the play." Her director was thrilled about her decision. The director taught her everything she needed to know and helped her with her role. Jasmine loved coming to practice each day.

Finally, tech week arrived. Mics were given out, costumes were being fitted, and makeup was purchased. Jasmine was getting nervous for the performance. Her director told her not to worry she would do amazing. Jasmine felt more confident after she spoke to her director.

After a long time of working extremely hard, the day of the show had arrived. Jasmine was onstage getting ready for curtain rise. A minute later, the curtain rose and the show began. Jasmine danced her heart out. The show was a big success and the audience gave them a standing ovation. It was the most fun Jasmine had ever had.

In the end, even though her parents didn't want Jasmine to become an actress, they saw how much she loved and enjoyed acting. Jasmine's parents finally approved of her becoming an actress. Jasmine decided that she wanted to do more productions. She continued to act, dance and sing until she one day starred in a Broadway show.
