

Vampire College

By Aria A.

I was a sad boy sitting on the sidewalk wishing I could turn back time and not make the mistake I had made. My name is Fred and I just got kicked out of college and I can not tell my parents so I went looking for a new college. It felt like I looked for centuries but then I finally found a college to re enroll in. so then I talked to the principle and she said she would get me into the college for free because of my excellent grades from my previous college. The first day of my new college I found something strange. Everyone looked like a vampire but I thought to myself no it can not be vampires do not exist but everyone had teeth that looked like sharp vampire teeth. When I mean everyone I mean everyone not a single person I came across in the hall did not have vampire teeth. So I went to my room and searched up on google and google said that no one ever actually knew if vampires existed or not. So I thought long and hard and thought I needed more proof if I was going to bust those blood sucking vampires so I looked on google again and found research that garlic and holy water help. If you wear garlic the vampires will hiss at you and if you spray them with holy water it is like fire burning on there skin for them so I started preparing. I went to the market down the street and bought garlic some strings and the biggest water gun in the universe then I went to the church down the street and filled up the water guns with holy water and put the garlic on strings. Then that night I could not sleep and I wondered there has to be a ancient vampire a vampire that started the whole infecting the whole brain the leader. I wondered all night and thought I might go to the principle because she did not have any requirements of a vampire. So the next day I went to the principle Ms Blackwater and asked her if she could arrange a school get together that everyone had to attend

she said no but then I said I need to bust some blood sucking vampires then all of a sudden she said yes. Then I asked her why all of a sudden she changed her decision when I said vampires she said no it is nothing like that just then I told her that I new she had something to do with vampires she said fine I will tell you but she made me take a oath not to tell anyone. So I was a vampire hunter in fact I was the best for my age division I spent several years practicing and mastering the skill of vampire hunting but then I quit I asked why she said because one day I had mistaken a innocent human for a horrifyingly vicious vampire and unintentionally killed them I said nothing I was speechless. So just as I was leaving she told me to take some of the vampire hunting weapons and gear to help me so when I was leaving she said good luck and don't get bitten. On the way back home I started making plans in my brain the gathering was only one day away so the next day finally came and I went to the gathering so the theme was vampire I do not know why now that is just weird. So I sprayed a vampire with holy water and it started hissing at me so I said to myself the action has begun After that I hit about 50 people and then they passed out for a bit and then came back conscious not ever knowing they where a vampire. I told them to back home luckily they remembered where they lived and there parents so I got every student vampire but then I came across the vice principle and she was a vampire to that second my mind went poof. I got some holy water and sprayed her but nothing happened the holy water had no effect so I thought for a second and it all connected just like puzzle pieces she was the vampire leader so she had to be about 50,000 years old just then she said I am going to turn you into a vampire just when she was just about to turn me into a blood sucking vampire she froze and fell to the ground. Behind her was the principle Ms. Blackwater with one of her vampire killing weapons we both looked back at the vice principle as she burned into ashes and that was the day I Fred George Collins made the blood sucking vampire tribe extinct once and for all.
