

Astral Banana

By Abel

Chapter 1

One day, NASA decided to send monkeys to space to see how they would live without the planet Earth. They were hoping that this would one day lead to humans being able to survive out in space. At first everything seemed fine, but the monkeys slowly began to lose their minds. They began to destroy the shuttle around them trying to find a way out. When the monkeys broke the barrier, the chemicals in the space shuttle had super smart gas to power the thrusters. The monkeys were contaminated with super smart gas, and their heads doubled in size. The space shuttle blew up, and they floated out into space. They were only able to survive since they breathed in so much smart gas. The monkeys were floating for so long that ten years passed by before their eyes.

Chapter 2

After 10 years, they were about to run out of oxygen. All of a sudden, they found flat pieces of space rock. They had just enough jetpack fuel to reach the platform. Suddenly, the platform started to rumble... it turns out that it

was a trap from

Chapter3

NASA did not remember sending monkeys into space 10 years ago. They decided that they were going to fight the monkeys out of fear. However, the monkeys pulled out a laser gun that they invented while they were floating out in space. The monkeys were outnumbered, but then a banana shaped meteor hit NASA's ship! The astronauts were pushed back into a hole created by the banana shaped meteor making them drift out into space. The astronauts' spaceship was also powered by super smart gas, so the monkeys were able to get a refill. Then, out of nowhere, the monkey gods rewarded them with a golden banana that could be planted in any soil and grow infinite bananas. The monkey gods told the monkeys if anything happens to the seed then all monkeys would not have any bananas and the monkey race would die out in space. Then the monkey gods gave the most brain powers to Bisto, the leader of the space monkeys. Each monkey

got an individual power, and that is how they became the elemental space monkey aliens.

Chapter 4

Everything was running smoothly until the space gorillas showed up. The monkeys wouldn't be surprised if NASA sent them to attack. Although the gorillas were strong, the monkeys had a trick up their sleeve. They had a banana cannon that was controlled by their powers. They blasted the canon at the gorillas. CABOOM! They shot the gorillas into space, and the monkeys were the strongest empire in the galaxy.

THE END.
