

Giant Wolf

Esteban G. – 4th Grade

One day while I was sleeping I hear something outside that hears like a howl of a wolf. So I get up to check out my window and I see something big, hairy, and scary! I get outside and see a giant wolf! I get super super scared so I run back in to my house and then hear VERY VERY loud bangs at my door then silence. I immediately run to my mom's room and even she is awake and horrified and I tell her what happened but she didn't believe me but not until I feel something big, strong, and with paws! Next thing I know I'm in a hospital laying in a bed, my mom then gives me a mirror I look at my neck and it's all purple then more than anything I want to get rid of that thing but can not because the thing is too big and strong. So we team up for the ones that got injured and after the whole night the giant wolf leaves very injured and tired and even us got injured and the giant thing never came back until 1 or 2 years later. The news man showed images of a giant wolf and we all saw that it had shots and more. We were glad of that because it was finally over for us. Finally peace.
