### The Challenge

One day a robloxion named Tony Hot Hams participated in a challenge for 1,000 robux. He balanced, he jumped, and he ran. But then the final challenge began. He had to kill one of his roblox friends. Then Tony Hot Hams had a choice to make either sword fight for the 1,000 robux or split it 50-50. He thought and thought then he decided to split it 50-50 with his friend.

The end.
