My Travels from Guatemala

There is a family that was from Guatemala. One member of that family was a girl named, Luisa. Luisa left Guatemala with her mom, Isabel and brother, Luis. The family had one goal, and that was to get to the United States. On her way from Guatemala to the United States, Luisa's adventure was very difficult because it was cold, hard and a long journey. Luisa, Isabel and Luis were not prepared, and did not have enough food and water for the journey. Luisa thought we have to make it. On the other side, Luisa grandparents Joe and Rosa and her three uncles and aunt were already in the United States waiting for their arrival. When they arrived in the United States, Luisa, Isabel and Luis finally got to relax. She knew a new journey would begin. Now that they are energized and recovered, Luisa and Luis enrolled at school. When school started, Luisa was placed in the second grade but really, she was supposed to be on third grade. She learned that the school systems are different from Guatemala to the United States. At the beginning of school, it was hard for, Luis and Luisa because they did not understand the teachers and the language they were talking. Luis felt she did not know what was going on. Luisa got upset and then cried. Luisa's new teacher, Ms. Martinez was a big help because she helped Luisa learn a new language and develop it. Now, Luisa can understand and have conversations in English. After all the help, Ms. Martinez gave to Luisa. Luisa passed the second grade. She learned to follow what you want and to reach and achieve.
