

The Glorious Sunset

Written by Jasmin P. and Vyann L.

What's better to lay down in the grass and watch the beautiful sun to set so the moon can have its turn.

At some point the sun turns more than just yellow. This is one reason I love to see sunsets on a very calm and peaceful day. Pink, red, yellow, orange, these are the colors we would see at sunsets. The way these colors mash up are more than just magnificent, they all have a purpose. Seeing a sunset can actually brighten someone's day by just looking at it. That's why I think sunsets are amazing! A picnic, family photo, weddings. Get someone to hang out with because you are getting to watch a sunset.
