CHAPTER 1:

The Mysterious Robber

Hey! My name is Jack. It all started after a mouse popped up and started running around my kitchen for cheese. Then my kittens started chasing it and ran off into the street but guess what I saw a white car stop in front of the kittens with a robber mask and got the kittens and drove away. Before I forget there was a special diamond that is worth \$500,000 which everyone wanted to steal and probably was the plan but it worked out easier for the black masked robber because the kittens just went right to him. Don't forget I am case solver so it time to face problems and find clues!

So then I found a hole in the mud with couple of big squiggly lines with a line over all of them with a ring that fell of that mysterious robber with a weight of 1.2 grams which gave me two clues.

CHAPTER 2:

Almost There!

Then I made a plan and made a fake mimic of the diamonds on the kittens and put it out the door saying help me find a \$500,000 diamond lost. One is with me right now help me find the other two! That can lure the black mask into coming in to my house during night.

Just how I expected, I heard a car door closing and I hid but when I looked outside it was my cousin who hates me, Charles. He came in and I told him I will give him some Pepsi and will be back and then I talked with Charles. After Charles left I looked at where I hid the mimic diamond but it wasn't there. So after that I suspected Charles as the owner of the black mask.

CHAPTER 3:

Caught Him

The next morning I went to Charles house and right on the counter top was three jewels made of diamond on a neckallace. But charles saw me so put the kittens away I knew because I heard a meow. Afterwards I look on the countertop the diamonds were not there, He hid them. I asked if I can have some Pepsi and while he was getting me one I searched for the kittens and saw them I quickly ran to my car and hid them. Then I looked for the diamonds which was easy since I had a radio local navigator that says here when really next to the diamonds .Then, I found them and hid them in my pockets and just in time when charles came I told him do you know where my kittens are? HE SAID, " NO." But then I yelled," " I KNOW YOU HID THEM UNDER THE BED." Then he got supriised and went looking for the jewls but I said I have them a ran into the car and told the police and then he was in the back of 5 iron bars and had a life long prison order from the jury.

Summary:

A kitten gets kidnaped with a \$500,000 diamond. Jake is on the case of the case of the missing kitten. Read on to know more
